Definitions

1. A leased luxury car is a new or used car that had a market value of more than the luxury car depreciation limit in the income year the lease began in A luxury car is treated as a sale and loan transaction for income tax purposes. Your employer will claim interest and depreciation as a tax deduction rather than the lease payments. The Luxury Vehicle Adjustment is designed to compensate the employer for the additional tax liability when the luxury car deductions are less than the lease deductions.
2. The PAYG tax savings based on your pre-tax salary sacrifice of per month.
3. The net GST input credits included in the monthly running costs and lease costs.

End of Term

Projected Value[1]

Profit on Disposal[3]	
Tax Payable	
Net Profit	
Total Cost of Ownership	per km

Definitions

1. The forecast future value of the vehicle adjusted for age, distance travelled and optional extras.
2. The residual value is the amount that remains owing on the car at the end of the lease contract including GST. Minimum residual values are set by the Australian Tax Office. At the end of the lease term, you'll need to pay the residual value. You also have the option to re-finance the lease for a further term.
3. This amount represents the after-tax profit on sale of the vehicle at the end of the lease term
