VSSS

(Vehicle Salary Sacrifice Schedule)

All amounts shown in this quote are indicative based on a 'true fortnightly' pay projection including salary, reportable allowances, and elective salary. It's current tax/FBT settings, CBA current vehicle pricing (and applicable statutory charges), and an indicative interest rate. Actual costs and savings may vary if there is any change to the above, including vehicle selection, the pricing we're able to obtain, or the policy vehicle pricing and cost of funding (the employer's interest rate will be different from the hire car). If the car or delivery of the lease start date is later than the valid period for this quote, if you're not eligible for the specified period and/or any other variables we don't control, estimates shown are subject to change.
